

## **THE BRUGUERA ACADEMY MANAGES ACCESS TO UNIVERSITIES IN THE UNITED STATES**

Many Bruguera Academy students have, after graduating from our official school and passing the final upper-secondary school exams in accordance with the Spanish education system, successfully gone on to study in other parts of the world.

At the Bruguera Academy, we manage access to universities in the United States by searching for the best option for each player. We also help them find sports scholarships, which allow the students to complete their degrees while playing top-level tennis in the United States. That is why students looking to attend university in the United States after leaving the Academy receive guidance from a professional at IMSE –a company specialised in managing sports scholarships for tennis players, so that they can train, study and compete at American universities- and support from the Bruguera Academy in achieving this goal.

Since most universities in the United States require students to pass the TOEFL exam, at the Bruguera Academy we prepare students to successfully complete these tests. Students will learn the best strategies to increase their score and become more competitive candidates for university admission. To prepare these exams, we arrange excellent private and group classes led by teachers with extensive experience.

### **“Students can attend university and play top-level tennis”**

Thanks to the Bruguera Academy’s extensive network, we are able to recommend our students to coaches at the best universities in the United States and help them find scholarships that will help them live the dream of studying and playing in America. At the Academy, we work with students one-on-one to explore the options that match their interests and capabilities. Scholarships are a fantastic reward for all the time, energy and money invested in their athletic and academic careers.
